

TopperNotes Final Upgrade Plan

Elevating User Experience & Backend Logic

| Redundancy Fix

The Old Issue

Having both "पढ़ें" and "Preview" buttons creates confusion as they perform the same action. It wastes horizontal space on the note cards.

The New Solution

Replace the redundant button with a direct **"Download PDF 📄"** button. This makes the primary action (getting the file) clearly visible on every row.

| Branding Consistency

Fixing Google Icon

The "Continue with Google" button is currently missing the official logo. We will fix the broken path and use the official Google 'G' SVG for a professional look.

We are also removing "Premium" labels to focus on "Scholar Contributions", making it feel more like a community project.

Better UX Suggestions

Subject Badges

Color-coded tags for Physics (Blue), Chemistry (Green), and Maths (Orange) for instant visual recognition.

Toast Alerts

Instead of basic browser alerts, we'll add modern 'Toast' notifications for "Points Earned" or "Download Success".

Scribd Viewer

Full-width document viewer with toolbar protection, ensuring the local server handles the stream correctly.

| Final Token Logic

STARTING POINTS

-2

PER DOWNLOAD

+1

PER UPLOAD

| Final Steps

- ✓ Replace "पढ़ें" with a functional "Download 📄" button on each row.
- ✓ Integrate official Google SVG Icon into the sign-in card.
- ✓ Implement Subject-Based color badges for better organization.
- ✓ Sync frontend points with backend session variables permanently.
